

LEGAL NOTICE

CITY OF WASHINGTON COURT HOUSE

OCCURANCE NOTICE: Dry weather response

The City of Washington Court House recently entered into an agreement with the Ohio EPA to address the flow capacity of our sanitary sewer collection system and the wastewater treatment plant, especially during wet weather periods. There are occasions that the City may experience a dry weather sanitary sewer overflow resulting from mechanical malfunctions in our equipment. The usual reason is related to power faults, pump problems or solids build up in the line.

A dry weather sanitary overflow has occurred at Green Valley Road and River Road at Manhole #1209 on March 26, 2007.
